

The owner of **All is Sharp Photography**, Joe started his photography career in 1973, while still in high school. His formal education includes still, motion picture and video photography from the U.S. Navy School of Photography and a Bachelor of Science in Photographic Science and Instrumentation from the Rochester Institute of Technology.

His working career includes 3 years as Ship's Photographer on the aircraft carrier USS FORRESTAL, 11 years as a Research Chemist, designing and manufacturing photographic film and paper, and 3 years working as a freelance photographer for Don Lordi of the **Allaire Studio**.

Founding **All is Sharp Photography** in 1990, Joe has worked to develop a truly full-service photography business either directly, or through association with several other local professional photographers. **All is Sharp Photography's** clients list contains a significant number of major businesses, educational institutions, and organizations throughout the New Jersey area. **All is Sharp Photography** is in its 18th year as a referral-only business.

In December 2005, having spent 5 years working for them as a freelance photographer, Joe was asked to take over Photography instruction for Georgian Court University and complete its transition from traditional film/paper to digital photography. "Doing photography is incredible fun....teaching it is completely over the top".

Joe has been a member of the Southern Monmouth Chamber of Commerce since 1996. He attended and photographed many of their events, parties, and meetings through those 12 years. He is an invaluable asset to the Chamber.
